

Nonpublic and Limited-Access Court Records

Revision January 2014

The following chart lists various court record types to which access is limited by statute, court order, or court rule. It should be used in conjunction with Component 19 of the Michigan Trial Court Case File Management Standards. While this chart can help provide guidance on the use of and access to confidential records, court staff should review the particular statutes and court rules and, when in doubt, consult with their chief judge on local interpretation. Each listed item begins with the specific record type that has its access limited, a citation to the relevant statute and/or court rule, and the duration of time that access to the record is limited (*Record Having Limited Access and Length of Duration*). Following this identification of the record type, the chart specifies what regulations or standards exist for the court's filing and storage of the record and for access to the record by court staff (*Filing and Court Access Requirements*). Each item ends with a listing of the various persons or agencies and the reasons for which they are allowed to have access to the record (*Possibilities for Access to Court Records*). The chart is organized by court type and category of case. Categories are as follows: General; Circuit Court (Civil and Criminal Divisions) and District Court; Circuit Court Family Division Friend of the Court; Circuit Court Family Division Juvenile; Circuit Court Family Division Adoptions; and Probate Court.

Notes:

1. The chart contains some statute references in which the only agency directed to maintain a nonpublic record is the state police. In order to insure the intent of the statute to keep these records confidential, courts are directed to maintain their records in these instances as nonpublic records. They are nonpublic pursuant to MCR 8.119(D).
2. In some cases, a statute or court rule makes **information** in a case file (as opposed to simply the file itself) confidential. This is the case when, for example, the law protects against divulging information in the file or when specific pieces of information (e.g., name or address) are made confidential. When information in a case file is made confidential, individuals should not divulge confidential information, and publicly accessible information sources outside of case files (e.g., indices, registers of actions) should not contain confidential information.
3. The collection, maintenance, and release of social security numbers by courts is governed by Michigan Supreme Court Administrative Order 2006-2, Privacy Policy and Access to Records. Administrative Memorandum 2006-04 provides the procedures courts must follow when providing copies of documents containing social security numbers, as well as remedies available to a party seeking to protect a social security number contained within a publicly filed document.
4. If a request is made to view a record that is nonpublic and the individual requesting to view the record is not allowed access under statute or is not a party to the case, the court should respond as indicated for each record type. In addition, there are nonpublic records that can not be acknowledged or identified. Those record types are identified under "Court response to inquiries."
5. If the court receives form MC 292 from a defendant as provided by MCL 380.1230d and MCL 380.1535a, it shall forward a copy of the form and information regarding the sentencing not later than seven days after the date of sentencing to the entities listed on the form, even if the court is maintaining the file as a nonpublic record. Pursuant to MCL 380.1535a(8), the court shall provide a certified copy of the judgment of conviction and sentence of a person with a teaching certificate within 7 days after receiving the request and fees under this section from the superintendent of public instruction or after entry of the judgment or other document, whichever is later, even if the court is maintaining the judgment or other document as a nonpublic record
